

CITY OF
HERMOSA BEACH
Public Works

CONSTRUCTION NOTICE

CIP 164, Hermosa Avenue Green Street

Dates: January 20, 2026

Locations: Refer to map below of work areas

Work hours: 8am – 5pm

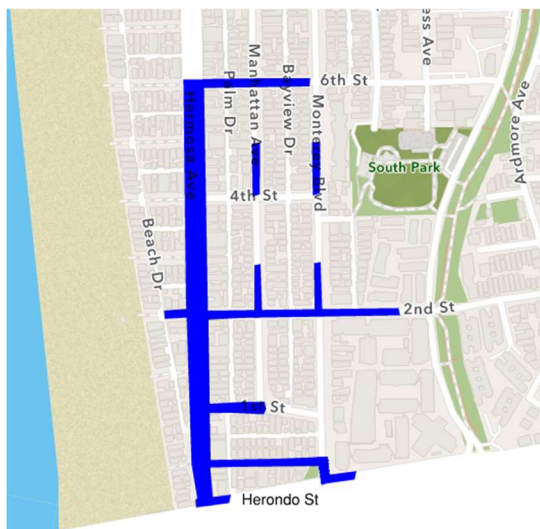

Work descriptions: Pavement sawcut and excavation, pervious concrete gutter installation and median tree planting

Dear businesses, residents, and property owners:

This notice is to inform you of an upcoming Capital Improvement Project (CIP #164). The project's purpose is to capture storm water and non-storm water runoff, to help reduce pollutants that would otherwise enter our ocean. The project has been identified by the Beach Cities Watershed Management Group (Hermosa Beach, Torrance, Redondo Beach, Manhattan Beach) to work towards meeting federal and state water quality mandates by the US Environmental Protection Agency (EPA) and the State Water Resource Control Board (Order No. R4-2012-0175-A01).

The City's contractor is anticipated to begin construction in early February 2026 and end in about April 2026 (pending weather and material supply conditions). The contractor will phase construction to minimize parking impacts, so please look out for no parking signs. Trash collection will continue regularly and contractor will coordinate to ensure services are not disrupted.

Watch for No Parking signs in the work area that will contain the work dates. There will be impacts to parking in the project area during this time.
